Behavioral Health Flush-Mount Analog Telephone (Keypad)

By Austdac Pty Ltd
Catalog # 276-002BH

GAI-TRONICS Behavioral Health series of rugged telephones are designed for use in environments where conversation privacy is desired but safety is a concern. The Flush-mount Handset Analog Telephone (Keypad) is equipped with a shortened, 12-inch handset cord to prevent the handset being used as a weapon and is also short enough to prevent the possibility of strangulation. Its rugged design provides both quality and longevity. The model is ideally suited for flush-mount installation in any area requiring standard telephone operation. The unit's rear dust cover protects the electronics for in-wall installation. The Model 238-003 enclosure can be used if surface mounting is more desirable. Adding an "AC" suffix at the end of either model will increase the handset cord length to 15 inches.

Features

- Flush-Mount design for Indoor Use
- Standard Telephone Operation
- Braille Chrome-plated Keypad
- Brushed Stainless Steel Front Panel
- Front Panel Pushbutton Volume Control
- Handset with Noise-cancelling Microphone, Hearing Aid-compatible Receiver, and 12-inch Armored Cord with Anchored Lanyard
