

# RED ALERT® VoIP Emergency Telephones, Retrofit Series - Code Blue; Model 398-712CB

By Austdac  
Catalog # 398-712CB

GAI-TRONICS' RED ALERT® Emergency VoIP Flush-Mount Telephones are designed to provide direct point-to-point communications between personnel throughout a facility over an existing internet protocol LAN. The Models 397-700CB and 398-702CB provide a plug-and-play upgrade to an existing Code Blue 6-hole telephone location with available Cat5E/6 cabling. The VoIP telephones are intended for connection to a 10/100 BaseT Ethernet and operate using power-over-Ethernet or an alternative power source. The VoIP telephone features real-time alarm reporting that enables system supervisors to monitor the phone's activity and address callers needs or maintenance issues immediately.
