

M-2069 Adapter Panel

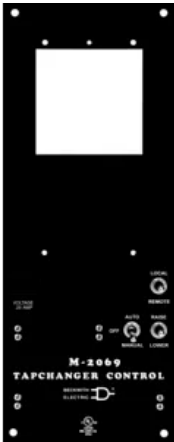

By Beckwith Electric
Catalog # [M-2069](#)

The M-2069 Adapter Panel, when combined with the M-2001C or M-2001D Digital Tapchanger Control, offers convenient, direct replacement of Westinghouse SVC or SVR controls and Beckwith Electric M-0067E controls or M-2067B adapter panels. The M-2069-M-2001D combination can also be used as a general purpose LTC transformer control. The M-2069 enables changing of the M-2001 control without adapter panel removal or rewiring.

Features

- Connects easily to the M-2001 Series Digital Tapchanger Control using four mounting screws and 24-pin connector
- Provides mounting adaptable to several different configurations
- Provides built-in CT shorting protection when the M-2001 Series Tapchanger Control is removed
- SCADA Cutout (Local/Remote) switch allows Local Blocking of SCADA commands (for use with SCADA enabled M-2001C and D controls)
- Convenient Auto/Off/Manual and Raise/Lower Switches for toggling between Automatic mode and Manual (local) mode to adjust the tapchanger position from the front panel
