

ICE BREAKER PADLOCK, MASTER KEY B

By Chance
Catalog # [DMPL61A2T](#)

For sub-station fences, switches, outdoor cubicles and other applications where ice, dust or corrosion are potential problems.

Features

- Padlock face is protected by a flush fitting, spring-loaded, flip-up lid
- Housing is one-piece sturdy aluminum alloy casting
- The swing open yoke is designed to break through heavy coatings of ice when opened
- All components are non-ferrus materials to prevent rust
- Each padlock is keyed alike with key I.D. 2382
- Replacement keys are part number DM21M903
