

Multi-Range Voltage Detector 69 to 600kV

By Chance Lineman Tools & Equipment
Catalog # [C4031140](#)

For use only on 69kV to 600kV systems, confirms a line is de-energized prior to performing maintenance operations.

Features

- Reads field intensity for approximate line-to-line voltage
- Capable of distinguishing actual line voltage from static or feedover from an adjacent line
- Must mount on proper length hotstick for the system voltage class
- Pushbutton self-test to confirm operational condition before and after each use

General

EU RoHS Indicator	No
Style	Analog Dial
UPC	096359018926

Dimensions

Weight	5.5 lb
WeightMetric	2.4 kg

Electrical Ratings

Withstand Voltage	69 - 600kV
-------------------	------------

Logistics

Standard Package	1
