

Rubber Blanket Canister, with Handle, 10 in x 37 in Long

By Chance Lineman Tools & Equipment
Catalog # C4032999

For physical and contamination protection, these canisters provide are lightweight yet durable and stow easily on service vehicles and in warehouses. Cylindrical shape helps promote proper treatment since rubber blankets should never be folded, creased or compressed when stored. Rolling blankets before inserting helps keep them ready for service. Blankets nested inside each other may be inserted or withdrawn one at a time as needed. The bright orange canisters are molded of high-impactresistant high-density polyethylene for tough, rust-free resilience. A polypropylene rope keeps the tight-fitting cap secured to the canister. Long-lasting construction.

General

Type Container
