

"H.M." Epoxyglas Bond Kit

By Chance Lineman Tools & Equipment
Catalog # [H1917](#)

The Epoxyglas Bond Patching Kit can be used to repair small surface ruptures on Epoxyglas Hotsticks, to install new ferrules on Epoxyglas poles, or to assist in replacing rungs on Epoxyglas Ladders. The kit consists of a tube of hardener and a tube of resin that are mixed immediately before repairs are made. A mixing stick is included, that can also be used to place the bond in the area to be repaired. Epoxyglas Bond contains the same orange color as used in Epoxyglas poles. Small surface ruptures can be repaired by removing damaged fibers, cleaning the void with Moisture Eater II cleaner-solvent and then applying Epoxyglas Bond.
