

Class 9998 Replacement Parts Kits

By Electric Controller & Mfg. (EC&M)

Replacement parts kits are available for magnet controllers and AC and DC Type M and MX contactors. Copper contact tips are used in standard applications. Silver-faced contact tips are recommended for applications where the contactors remain closed for long periods of time. Silver-faced contact tips are supplied as standard on crane main disconnect switches and are optional on DC starters and other devices. Each tip kit contains movable and stationary contacts, necessary hardware and servicing instructions

Features

Kits contain Operating Coils, and Contact tips kits with mounting hardware
