3/4" Ground Rod Clamp Stainless Steel

By EMC
Catalog # EM-5834-SS

*Representative Image

Stainless and/or bronze construction for superior corrosion resistance. Can be applied underneath an existing clamp without removing it. Split design allows fast, easy installation. Accommodates ⅝" and ¾" ground rod, with #6 and #4 AWG ground wire. Driven ground rods with a "mushroomed" head do not impair the installation of this clamp. The addition of a second flat washer allows the installer to connect an additional ground wire.

Features

- Stainless Steel for 3/4′ and 5/8″ Ground Rods

General

Material	Stainless Steel

Conductor Related

Conductor Size	#6 and #4 AWG
