

3/4" Ground Rod Clamp Stainless Steel

By EMC

Catalog # [EM-5834-SS](#)

Stainless and/or bronze construction for superior corrosion resistance. Can be applied underneath an existing clamp without removing it. Split design allows fast, easy installation.

Accommodates 5/8" and 3/4" ground rod, with #6 and #4 AWG ground wire. Driven ground rods with a "mushroomed" head do not impair the installation of this clamp. The addition of a second flat washer allows the installer to connect an additional ground wire.

Features

Stainless Steel for 3/4" and 5/8" Ground Rods

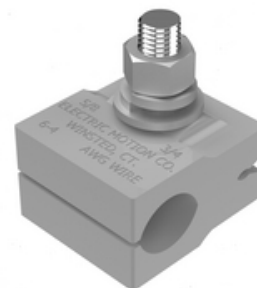

General

Catalog Number	EM-5834-SS
