

Riser Pole Ground Clamp

By EMC

Catalog # [EM-716RPC](#)

P-Bail

Features

* Lightning arrester can be installed live with a hot stick, keeping line tech 8 FT away, rather than 18" with direct connection. * Grounding of circuit can be made without removing any wildlife protection. * Grounding loop prevents slipping off of clamp while installing. * No need for wildlife protection - no need for "B" phase to cross over the pole on a pin insulator. * The design works with one fiber-glass bracket, thus eliminating the need for two aluminum brackets. * Greatly reduces the attraction for nesting birds and other wildlife. * Underground duct can approach the cable terminal pole from a wider degree than other designs.

General

Catalog Number EM-716RPC

Certifications And Compliance

Buy America(n) Qualified TAA Compliant (All status valid till December 2024)
