FIBERHUBB™
High Density FEHD Series

FiberHUBB™ FEHD Series features a new ultra compact design that is scalable for any fiber data center application.

Easily install 144 LC connections inside the 1U rack space with built in labeling features, slide out drawer, ample cable management features, and a robust construction that ensures protection. A true "plug-n-play" design, the FEHD Series has the flexibility to reconfigure, partition, or scale up to future migrations with interchangeable cassette modules.
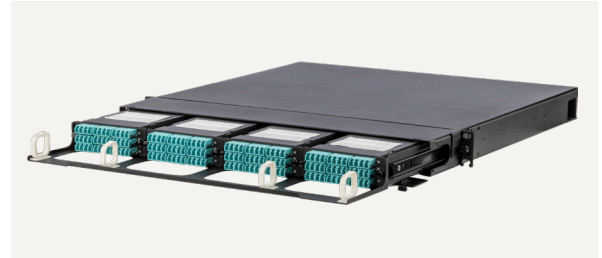

Features & Benefits

- Reinforced steel construction
- Easy-Slide out drawer
- Fully removable covers
- Built in cable management rings
- Accessory kit and label card included

Specifications

- Height: 1.75"
- Width: 19"
- Overall Depth: 17.8"
- Depth to Mounting Flanges: 14.6"
- Weight: 21.6 lbs

Applications

- Data Center fiber distribution and equipment interconnect
- SAN/LAN Interconnect facilities
- Rapid deployment high density interconnect
- Optical network partitioning and consolidation
- Retro-fit legacy networks for space consolidation
