

S Series

By Gleason Reel

S-Series Festoon Trolleys are designed and constructed to fit varying S-Beam and W-Beam sizes with their adjustable chassis. They are made of steel with a bright zinc finish. They utilize bolt-on wheels for easy changeability if or when they need replacing. With a maximum speed of 295fpm, the four-wheel trolley has a maximum rolling load rating of 200lbs. The S-Beam trolleys are ideally used on monorails to transport electric cables or air hoses. The trolleys can be ordered with a variety of flat cable, round cable or hose saddle
