

TMA (Telephone Management Application) Package (Analogue) SMART Software Kit UK plug

By GAI-Tronics

Catalog # [100-02-0309-001](#)

TMA - Telephone Management Application is a Windows® based software package that allows you to remotely monitor the health status of your SMART GAI-TRONICS telephones, program their functions and log and report on their stats - all over a standard telephone line. These features ensure that your phones remain operational with minimal manpower.

Features

- Ensure your phones are operational
- Streamline manpower
- View at a glance status information
- Plan maintenance and repair work
- Generate automatic reports
- Establish comprehensive database
