

TMA (Telephone Management Application) Package (GSM) SMART Software Kit (UK)

By GAI-Tronics
Catalog # 100-02-0309-004

TMA - Telephone Management Application is a Windows® based software package that allows you to remotely monitor the health status of your SMART GSM (GSM-R) telephones, program their functions and log and report on their stats - all over a standard telephone line. These features ensure that your phones remain operational with minimal manpower.

Features

- Ensure your phones are operational
- Streamline manpower
- View at a glance status information
- Plan maintenance and repair work
- Generate automatic reports
- Establish comprehensive database
