GAI-TRONICS®

TMA (Telephone Management Application) Package (Analogue, VoIP & GSM) SMART Software Kit UK

By GAI-Tronics
Catalog # 100-02-0309-005

TMA - Telephone Management Application is a Windows® based software package that allows you to remotely monitor the health status of your (Analogue, VoIP & GSM) SMART GAI-TRONICS telephones, program their functions and log and report on their stats - all over a standard telephone line. These features ensure that your phones remain operational with minimal manpower.

Features

- Ensure your phones are operational
- Streamline manpower
- View at a glance status information
- Plan maintenance and repair work
- Generate automatic reports
- Establish comprehensive database
