

Mine Dial & Page Telephone

By GAI-Tronics
Catalog # 491-204

The GAI-Tronics Mine Dial/Page Phone system provides the convenience of a telephone station plus paging capabilities, in gaseous or dusty locations where standard telephone equipment is considered too hazardous. Mine Dial / Page Telephones are rated as “permissible” for use in coal mines by the Mine Safety and Health Administration (MSHA) of the United States Department of Labor (Approval 9B-221).

Features

- Selective and All-Call Paging
- Private Conversations
- Can place and receive outside calls.
- Each station allows simultaneous, independent conversations on each phone.
- Emergency page function is automatically enabled if switchboard is out of order, or if power fails.
- Flashing light designed for use in noisy areas where a ring might not be heard; light also improves ability to locate phone in dark areas
- For ease of installation, each interface cabinet supports up to 80 extensions
- 8-hour battery backup

Certifications And Compliance

Certified Listed MSHA - Approval 9B-211
