

# HUBBCOM™ Remote IP Stainless Steel Device (Door/Gate Access)

By GAI-Tronics  
Catalog # [GRC600SS](#)

The Stainless Steel HUBBCOM™ Remote IP device adds two important features to a HUBBCOM™ system. As a door or gate entry device it provides the convenience of card entry with the ability to connect to a live attendant for entry. HUBBCOM™ Remote stations give you the option of unlocking an entry via either a Wiegand-compatible security system or a USB-connected remote input/output module. For added peace-of-mind, if an invalid card is tried too many times, a HUBBCOM™ Remote station can go into “lockdown” mode, temporarily disabling the card reader and capturing an image of the person attempting entry.

## General

CE Compliant	CE Mark
Connectivity Options	PoE/PoE+, 802.3a f compliant (via RJ45)
Operating Temperature	-35° C to +66° C (-31° F to +151° F)
