

## IP Line Extender - LE300IP

By GAI-Tronics  
Catalog # [LE300-IP](#)

The GAI-Tronics Model LE300-IP Line Extender is used in pairs to connect two Page/Party®, SmartSeries™ or ICS systems together over an IP Network using Fast Ethernet or Gigabit Ethernet access. It can extend the system by linking two Page/Party® system cables located in areas separated by an appreciable distance.

### Features

- For Use with Page Party® and SmartSeries™ Systems
- Transmission over an IP Network
- Digital Transmission of Page Line and 5 Party Lines and Data
- Transmission Range only limited by the IP Network
- T1 or E1 Technology Supported
- Page Line Monitor
- Audio Detector
- Ground-Fault Detector
- 5 External Auxiliary Outputs
