

High Voltage Grounding Stick

By Hipotronics
Catalog # [HHDA13-280](#)

The stick can safely discharge devices under test (DUT) that have had up to 120kV applied to them. After high voltage has been applied to a DUT such as cable, switchgear, transformers, or other electrical apparatus, it is very important to discharge the DUT to ensure it can be safely handled after testing.

Features

- External safety grounding device
- Grounding Stick with 25ft braided lead, rated to 120kV

General

Catalog Number	HHDA13-280
UPC	850029708070

Dimensions

Weight	10 lb
