

**Versa-Tech® LT Single Phase
Recloser**

By Hubbell Power Systems

The Versa-Tech® LT (VTLT) is the most economical Versa-Tech recloser solution for lines up to 100A continuous current. Building on our first-generation Versa-Tech 1 foundation, it is an electronically controlled recloser configured through a User Interface (UI) through wireless or serial communications. The Versa-Tech is a versatile, self-contained, and self-powered data-collecting mechanism that is not only easy to use but also virtually maintenance-free. The Versa-Tech Recloser has been tested to meet or exceed IEEE Standard C37.60-2003.

Features

- Single phase recloser with magnetic-vacuum interruption technology
- 4kA, 29.3kV Interrupt Rated
- 100A Continuous Current Rated
- 125kV BIL (150kV BIL with standoff insulator)
- 10,000 Mechanical operations

General

Ambient Temp. Range	-40°C to 60 °C
Type	Versa-Tech® Single Phase Recloser

Dimensions

Weight	46 lb
--------	-------

*Representative Image

Electrical Ratings

BIL	125 kV
Current Rating	100 A
Frequency Rating	50Hz or 60 Hz
