## GridHUBB™

By Hubbell Power Systems

GridHUBB is a complementary software tool for the administration of Hubbell Utility Solutions intelligent devices. It is designed to simplify and integrate device management tasks for Hubbell devices into a single application. Quickly create, manage, and commission settings in an intuitive application packed with powerful tools and advanced reporting.

### Features

- Single platform for all the device management needs of Hubbell intelligent devices
- Adaptive workspace for Windows, iOS, and Android. Compatible to work everywhere you do, from desktop to mobile phone
- Multiple language settings ensure accessibility for diverse workforces
- Easy set up and navigation with frustration-free settings management and seamless device setup

- Advanced reporting tools provide helpful insights and actionable data to support decision making
- Embedded Guidance offers guided self-help, embedded reference, and training materials ensuring, help is just a click away.
