

3024 Neutral Grounding Resistors

By Hubbell Industrial Controls (ICD)

Used to limit the maximum fault current to a value which will not damage generating, distribution, and other equipment in the power system, yet allow sufficient current flow to operate protective relays and clear the fault.

Application

Resistance grounding of industrial power systems

General

Electrical Ratings

| | |
|----------------|------------------------------------|
| Voltage Rating | 139V to 8000V Line to Neutral V |
|----------------|------------------------------------|

Certifications And Compliance

| | |
|----------------------|---------|
| Industry Standard(s) | IEEE 32 |
|----------------------|---------|
