

LPC-250

by CMC
Catalog ID: LPC-250

Insulated phase line connector cover

- Designed for use on open wire or multiple cable secondaries to permit readily accessible service connections.
- The connector is constructed of high quality 6061-T6 for strength and conductivity.
- Takes up to four taps. Taps may be added later without interrupting service or removing cover.
- Impact resistant cover and clamp are clearly marked with easy-to-read cable ranges.
- Extended insulating shields on the cover make cable stripping much easier
