

LX960A Low Suction/Shutdown Panel

By Metron/Metron-Eledyne

LX-960 Low Suction Pressure Alarm and Shutdown Panels are designed to be used with electric and diesel engine driven fire pump controllers. They provide pump shutdown in the event a low suction pressure condition occurs. In addition, these panels provide audible and visible alarms for the following conditions:• Control Power Available• Low Suction Pressure• Suction Pressure NormalThe LX-960A shutdown panels are intended for use where a local authority mandates pump shutdown in the event of low suction pressure. Dual input power is supplied as standard feature.
