Compression connectors, Aluminum pin terminal

- Tinned copper rod factory crimped into an aluminum compression sleeve. Cavities are pre-filled with electrical joint compound and capped
- Pin terminals are widely used in clamp-type plated bronze connectors, common to pole-type transformers, disconnect switches, cutouts and lightning arrestors, to allow aluminum conductors to be connected. The transition from copper to aluminum is made within a sealed compression joint to assure protection from bi-metallic corrosion.

Product Details

General

Material	Aluminum
UPC	192663119042

Dimensions

Equivalent Pin Size	4/0 Sol.
Length	11 in
Length - Pin	6 in

Electrical Ratings

Voltage Rating	600 V
----------------	-------

Conductor Related

Conductor - ACSR Str Size	4/0 Str.;200 Kcmil
Conductor Diameter - Maximum	0.63 in
Conductor Diameter - Minimum	0.564 in
Conductor Diameter Range	0.564 - 0.63
Conductor Range	250-300 Str.;300-350 Comp. Str.
