

WR17000 | Type WR Wirewound Resistor

By Powerohm
Catalog # [WR17000](#)

Type WR Wirewound Resistor 170 Ohms 1.23 A

Features

- Powerohm's Type WR Wirewound Resistors are designed for low current applications ranging from 1.0 to 32.0 amps continuous, and resistance values ranging between 250.0 and 0.25 ohms, respectively
- Can be used for any type of AC or DC power application, including motor control, dynamic braking, neutral grounding and load testing
- The corrosion resistant Type WR resistor will withstand considerable shock and vibration, qualifying it for use in most harsh environments
- Continues Wattage:254

General

Resistance Ohms 170 Ohm

Dimensions

Depth	2.75 in
Length	2.75 in
Weight	0.8 lb
Width	2 in

Electrical Ratings

Current / Amperage Rating	1.23 A
Maximum Current Rating Amps Continuous	1.23
Wattage	254 W
