

WR850 | Type WR Wirewound Resistor

By Powerohm
Catalog # [WR850](#)

Type WR Wirewound Resistor 8.5 Ohms 7 A

Features

- Powerohm's Type WR Wirewound Resistors are designed for low current applications ranging from 1.0 to 32.0 amps continuous, and resistance values ranging between 250.0 and 0.25 ohms, respectively
- Can be used for any type of AC or DC power application, including motor control, dynamic braking, neutral grounding and load testing
- The corrosion resistant Type WR resistor will withstand considerable shock and vibration, qualifying it for use in most harsh environments
- Continuous Wattage:417

General

Nominal Current (A)	417
Resistance Ohms	8.5 Ohm

Dimensions

Length	8.5 in
Weight	0.9 lb

Electrical Ratings

Current / Amperage Rating	7 A
Maximum Current Rating Amps Continuous	7
Wattage	417 W
