

Capstan Hoist Hitch-Receiver Mount, for 1,000 lb Units

by CHANCE Utility
Catalog ID: T3080999

Faster than any other method, this job-ready mount puts a capstan hoist in the right position for pulling, stringing and lifting jobs. With the hoist stored on it, the mount's square tube simply inserts and pins in any 2"-square receiver of a Class III or IV towing hitch. Now capstan hoists can be as universal as this type trailer hitch is to most service vehicles. The T308-0999 Hitch-Receiver Mount features a hole pattern specifically designed to fit Swivel-Base Mount C308-0903. For more details, see Catalog page 1156. The swivel mount's turntable design permits proper alignment without repositioning service vehicle. The swivel mount permits pinning the bracket at every 15° interval around the circular base for stringing, tensioning, sagging conductors- pulling in cable- hoisting equipment- setting poles- pulling vehicles. The Hitch-Receiver Mount is rated at 1,000 lb. to correspond with the ratings of capstan hoists for which it is intended. Only 12V, 115V and Hydraulic 1,000-lb.-rated hoists are recommended for truck mounting.
