

## Pad Mount Deadfront Fused Sectionalizer

By Trinetics

Low-profile fused sectionalizing gear designed for critical 200A/600A circuits where the system must be protected and sectionalized. Units are designed for safety, ease of operation, versatility and aesthetics. They are available in single- and three-phase for radial or loop circuits through 35kV.

### Features

- The fused sectionalizing enclosure is available 5kV through 35kV.
- White electrical grade fiberglass provides electrical insulation and enhances visibility.
- 304 Stainless steel hinges and hardware.
- Mimic bus on dead-front side and on individual lift-out rear barriers in fuse compartment.
- 12 ga. steel throughout provides extremely high strength.

- The enclosure is designed for outdoor installation and is completely assembled prior to shipment.

### General

Color	Munsell Green
Material	Steel
