## HUBBELL Power Systems

# **TECORupter® Vacuum Interrupter**

By Turner Electric

Different models of the TECORupter can interrupt various types of circuits.Designed to IEEE 1247, the TECORupter is the choice for circuit interruption.

#### Features

- Turner Vacuum Interrupters can be used on a variety of switches ranging from 15kV to 230kV.
- When requesting a quote, please specify what kind of switch you have, as well as the current and the voltage.
- Please see the attached flyer for more information on our vacuum interrupters.

### Application

Load break device using vacuum technology to break full system load up to 3000A with no adverse environmental side effects. Can be mounted on a wide range of HPS and OEM switch types to ensure safe operation during opening of switches.

### General

Туре

Adaptable to multiple switch versions

Up to 3000 A
