## General

|                |  |
|----------------|--|
| Application    | WEEB washers offer a simple, low cost method to bond any non-conductive coated surfaces together reducing time, labor costs and the amount of copper wiring. WEEB's patented teeth pierce through most non-conductive coatings and embed into the underlying metal creating a bonding connection between the mounting surface and coated metal component that it is installed on or between. |
