

# 8" LED Cylinder LCC8LED

120 - 277V  
0-10V Dimming  
1000-2400 Lumens

## APPLICATIONS:

LiteForms™ LCC8LED Series is a 8" commercial grade LED cylinder with available outputs between 1000-2400 lumens. This is suitable to replace most indoor/outdoor CFL cylinder applications in a variety of commercial, retail, and institutional spaces to achieve wide distribution illumination patterns on vertical walls or columns while realizing substantial energy and maintenance savings. Rated for a minimum of 50,000 hrs life (70% lumen maintenance) with ambient temperatures up to 30°C (86°F) during operation.

## HOUSING:

Seamless heavy gauge aluminum cylinder body with durable powder coat paint finish and die cast aluminum canopy arm (wall mount) in a variety of architectural colors including Prescolite's exclusive Zet, metallic silver.

## REFLECTOR:

High purity spun aluminum self-flanged reflector with iridescence suppressed Alzak semi-diffuse anodized (standard) or optional white or black painted finish.

## LED LIGHT ENGINE:

The LCC8LED light engines apply mid power Nichia LEDs, specifically mixed to provide a minimum of 80 CRI or 90 CRI with 3 SDCM color consistency. The use of multiple mid power LEDs allows for optimal thermal management by effectively spreading the heat over a larger area, eliminating hot spots. A diffuse yet highly transmissive lens obscures the view of the LEDs and creates a smooth, even look from below.

The light engine is available in multiple lumen packages and Kelvin temperatures to accommodate any design requirement. The system is designed to provide optimal life and

lumen maintenance (50,000 hrs at 70% lumen maintenance). The reflector/light engine assembly features a torsion spring installation for mechanical retention to the cylinder housing.

## LED DRIVER:

The LCC8LED is offered standard with a constant current LED driver with 0-10V flicker free dimming to 10%. Other driver options are available including 0-10V dimming to 1% (DM1), Lutron EcoSystem dimming to 1% (EDM), or Lutron 2-wire Leading Edge dimming to 1% (120V only). All options are Class 2 compliant, have inherent short-circuit and overload protection, and meet UL 8750 with a 50,000 hour minimum anticipated life.

## INSTALLATION:

Available cylinder mounting options include wall mount, ceiling/surface mount, pendant stem mount, cord/cable mount. Each mounting has a quick connect feature that allows easy access for future technology upgrades.

## CERTIFICATIONS:

CSA certified to US and Canadian safety standards. Wall mount suitable for wet location. Pendant suitable for wet location under canopy/covered ceilings only. Surface and Cord/cable mount suitable for damp locations. This product qualifies as a "designated country construction material" per FAR 52.225-11 Buy American-Construction. Materials under Trade Agreements effective 6/10/2020. See [Buy American Solutions](#).

## WARRANTY:

5 Year Warranty. See [www.prescolite.com](#) for details.

### Lumen Multiplier Table

Photometrics for the LCC8LED are published below at the nominal temperatures of 3500 Kelvin. This table may be used to approximate the lumen values at different Kelvin temperatures. Power consumption would stay the same.

5000 Kelvin	1.09
4000 Kelvin	1.00
3500 Kelvin	1.00
3000 Kelvin	0.99
2700 Kelvin	0.96
